Women Safety

## Women Safety

- According to National Crime Records Bureau (NCRB) 2013 annual report, 24,923 rape cases were reported across India in 2012.
- And many rapes go unreported.
- Not only rapes, Indian Women also witness large amount of acid attack, harassing, kidnapping and assault.
- Women think twice before stepping out of their homes, especially at the night. This is, unfortunately, the sad reality of our country that lives in constant fear.

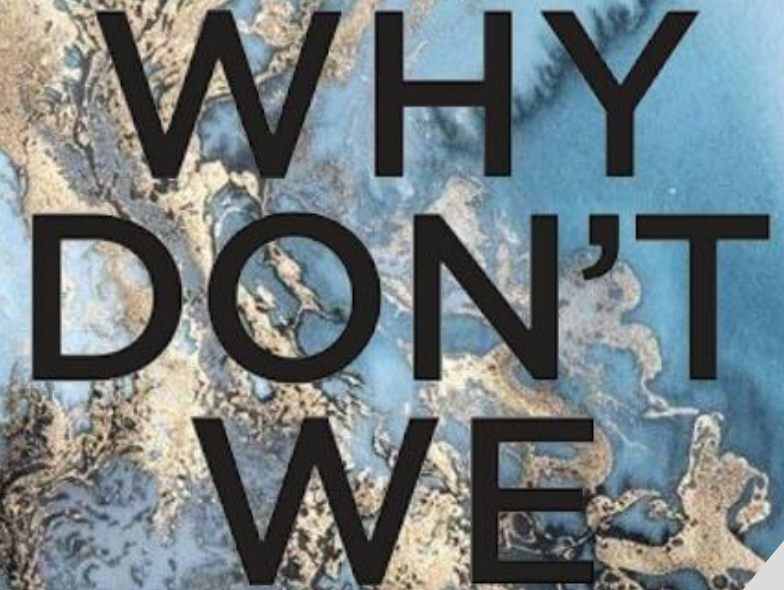

# What App Does?

- So to help out women from this problem, my part of the contribution is that I developed an app called 'We Care'.
- The app has an add friend option. A friend can be added by entering google mail.
- A panic button, 'HELP' is available at the main screen of the app, which when pressed by the woman in need, it will capture the woman's location and send a notification to all the users of the app, who are in 10km range of the woman and to all the friends.
- The notification includes the name of the woman with the distance of the user from the woman. On clicking the notification exact location of the woman can get on the google map. The users can be there to rescue.

# Why We?

- The question arises, that why any user should volunteer?
- Let's split it into two groups men and women.
- Women will volunteer because they know what it feels to be there when someone is harassing you.
- Men should volunteer to prove that not all men are alike and someday this same can happen to their love ones.
- Together they can make society a better place for women.

WHY  
DON'T  
WE

# How it helps?

- The time taken by the police or friends to arrive for help could cause a danger to the woman. But nearby peoples can reach quickly to save her. This reduces the time to help a woman in need.
- It also develops a mentally in society peoples to fight against the shameful acts against women irrespective of their relationship with her.
- Its like precaution is better than cure. Taking actions and willing to volunteer before acts like Nirbhaya or Priyanka Gandhi rape cases happen again would be a much better option than doing candle march and protests after such activities.

# Thank You.
